SECURITY PRODUCTS

SECURITY PRODUCTS

Established in 1975 ADI Security Products was born on the South Coast of New South Wales, in the small coastal town of Gerringong. The brain child of Brian and Peter Preddey, both locksmiths by trade, ADI made a name for itself as innovators of niche locking solutions. Chief among these was the Preddey Bolt, now known as the ADI Bolt, which is still the go-to choice for securing shop fronts, warehouse and storage facilities.

In 2015 ADI Security Products was acquired by LSC and we continue to produce ADI Security Products on Australian soil, with product assembly now taking place in Brooklyn, Victoria.

ADI Security Products provides an extensive range of locking solutions for locksmiths and architectural distributors.

ADI manufacturers locking devices for industrial, retail and public works to restrict or prevent the possibility of forced attack on doors and locks.

HEAVY DUTY LOCK BOLTS

ADI heavy duty locking bolts are suitable for securing shop fronts, warehouses, hotels, community recreation areas, storage facilities and garages.
