## About Us

Elite Hardware is a New Zealand owned and operated company supplying kitchen and furniture hardware with the main emphasis on cabinet handles. We pride ourselves in providing excellent knowledgeable service and quality products at competitive rates.

Our products are imported directly to our Christchurch warehouse. The majority of these products are unique to Elite Hardware.

The full range of these products can also be viewed online on our website [www.elitehardware.co.nz](http://www.elitehardware.co.nz)

---

## Installation Warning

After purchasing handles from Elite Hardware Ltd, please check that you have the correct size and finish.

Elite Hardware Ltd will not be held responsible for incorrect hole drilling and fitting.

Finishes can vary slightly between shipments.

Photos in this catalogue are as close to the finished product as possible.

Colour shades can vary due to printing process.

All handles are guaranteed against faulty workmanship.

Products are subject to change.

Elite Hardware Ltd holds no responsibility for any errors shown in this publication.

All measurements are in millimetres unless otherwise stated.

## K Push Tech - Push to Open System

K PUSH TECH is the fully renewed and extended program of automatic opening systems for doors without handles or knobs. A special inner mechanism provides a very silent, yet powerful utilization, granting a long durability which makes it perfectly suitable for a wide range of doors.

K PUSH TECH is available with buffer, for cabinets using sprung hinges, and with magnet, for cabinets using unsprung hinges or negative hinges.

The aesthetic of buffers is now improved and the range of catch plates for version with magnet is even wider.

Lengths of the output paths: Medium – 20 mm, Long – 37 mm.

Ring thickness is 0,6 mm. Increased adjustment feature: +6 / -0.45 mm.

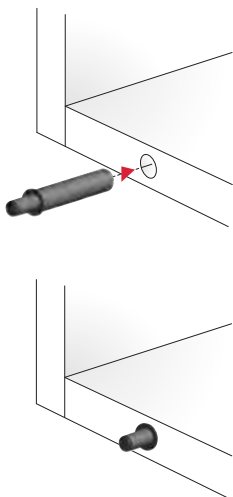

Beyond this negative adjustment the spring is deactivated. This feature allows to disable the ejector pin for safety reasons.

Perception of steps indicating the adjustment of the ejector pin: every step-stop position adjusts the door gap by 0.15 mm. A click-stop indicates the maximum adjustment range. These features prevent any undesired change of position of the ejector pin during its utilisation.

Highest magnet strength available in the market. New high performing materials to withstand unusual stresses and to avoid parts' damages. The new magnets are installed completely flush with the head of the ejector pin, in order to avoid any scratches on the door plates.

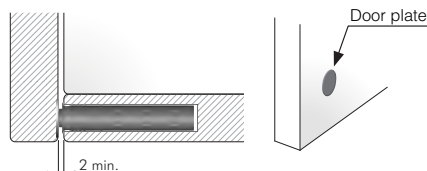

PAT. PENDING REGISTERED DESIGN

### INSTALLATION TO BE EMBEDDED INSIDE THE PANEL

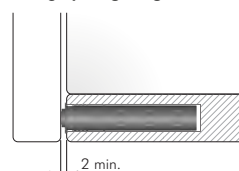

For details refer to K PUSH TECH and K LOCK DOOR PLATES.
