

## PC & OS REQUIREMENTS

DSX, DSX-SQL, PC Master, L85 and SIO are compatible with the latest and most recent Windows Platforms. PC Hardware and Operating Systems for these applications are outlined below. The hardware requirements are a minimum specification, which can always be exceeded if desired. All PCs used in the DSX system <u>must meet these minimum requirements</u> for the system to be supported by DSX.

**Note:** System performance is dependent on the PC and LAN processing speed. If you have any questions regarding the DSX software and PC requirements, please call DSX Technical Support. This PDF located on the DSX Website supersedes all other disseminations. EOL Operating Systems are not supported. Laptops are for Service and Setup. They are not supported in a Server Role.
