Mifare 1K memory Key fobs provide an excellent access control solution.

- Offering reliable and secure identification, making them ideal for access control, time attendance, and membership applications.
- Are compact and convenient, allowing users to carry their credentials on a keyring for easy everyday use.
- Deliver fast contactless performance, enabling seamless access and reducing queues at entry points.
- Provide durable construction, making them suitable for long-term use in corporate, commercial, educational, and residential environments.
- Integrate easily with existing MIFARE-based systems, helping organisations expand or upgrade their security infrastructure with minimal disruption.

Material	ABS Plastic
