Commodore Bollard

AC100B

OVERVIEW

Leda's Commodore Bollard Range combines strength, style, and practicality in a lightweight aluminium design. Suitable for both traditional and modern environments, the aluminium construction offers durability, corrosion resistance, and ease of handling.

Available in fixed in ground, removable, or surface mounted options, the range provides flexibility for a wide variety of sites. The Commodore can be supplied in a wide selection of powder coated colours, allowing it to either blend with or stand out against surrounding architecture.

KEY FEATURES AND APPLICATIONS

- **Classic Design:**
Features detailing to complement traditional and modern environments.
- **Low Maintenance & Durability:**
Made from aluminium, naturally corrosion-resistant, and long-lasting with minimal maintenance.
- **Wide Range of Applications:**
Streetscapes, parks and recreational areas, commercial developments, shopping centres, building entrances and forecourts, public squares and plazas.
