

BR66F

BICYCLE RACKS

OVERVIEW

Utilising the available wall space in a bicycle parking area is an effective way to maximise storage capacity while maintaining an organised and secure environment. Wall-mounted systems allow unused vertical space to become practical parking real estate, increasing the number of bicycles that can be safely accommodated without expanding the footprint. The BR66F is a purpose designed wall-mount bicycle rack that offers a simple, efficient, and reliable parking solution. Its sturdy construction, ease of use, and space-saving design make it ideal for sites looking to optimise bicycle storage while keeping bicycles neatly arranged and secure.

With its streamlined form and durable build, the BR66F provides dependable support for a wide range of bicycle types. Its elevated mounting approach helps reduce clutter at ground level, making cleaning and general site access easier. Whether installed in residential buildings, workplaces, or public facilities, the BR66F delivers a practical and space efficient solution that enhances both usability and overall site presentation.

Choose Securabike for your bicycle parking needs, and experience the quality and reliability that comes from our extensive expertise in the industry.
