## BICYCLE RACKS

**Back to Back  
Multiple Unit Arrangement**  
16 bicycle capacity shown

### OVERVIEW

If you're facing bike parking challenges, consider this rack as your solution. It allows you to maximise bike storage in any given space more effectively than any other rack in the range. Plus, it's straightforward to assemble and install on-site.

The racks are delivered in flat pack form and can be quickly bolted together and set up at your location.

Please note that Securabike recommends horizontal racks over vertical ones, as horizontal racks don't require lifting the bike. Given the often limited space available, a combination of horizontal and vertical racks may be necessary to accommodate both space constraints and the needs of certain cyclists, such as the elderly, who may find vertical racks less accessible.

Choose Securabike for your bicycle parking needs, and experience the quality and reliability that comes from our extensive expertise in the industry.
