

CBR6SCTM

COMPACT RACK

OVERVIEW

Leda's Securabike CBR6SCTM is a robust and reliable bike rack designed to securely park up to six bicycles in an organised and cyclist-friendly layout. With larger 500mm spacings and staggered heights, it provides 1000mm spacing at the handlebars, significantly reducing handlebar clash and making it a favourite among riders. This configuration is highly recommended where space permits and user comfort is a priority.

Built to withstand the elements and high-traffic use, the CBR6SC is constructed from galvanised steel and is available in powdercoated or stainless steel finishes to suit different aesthetic and environmental requirements. Ideal for schools, commercial premises, public spaces, and end-of-trip facilities, it offers both durability and ease of use.

Choose Securabike for your bicycle parking needs and experience the quality and reliability that comes from our extensive expertise in the industry. Please note also available in stainless steel.
