OVERVIEW

Leda’s Parisian Bollard Range combines functionality with architectural appeal, making it a popular choice for both traditional and contemporary environments. Manufactured from high-quality aluminium, these bollards are available in both round and square profiles, offering flexibility to suit different design requirements.

The Parisian bollards can be supplied in a wide variety of colours, allowing them to blend seamlessly into surrounding architecture or stand out as a design feature.

The Parisian Range is particularly suited to projects where style, customisation, and long-lasting performance are essential.

KEY FEATURES AND APPLICATIONS

- Design:**
Offered in both round and square profiles, suited to traditional or contemporary environments, and enhancing streetscapes, building entries, and open spaces.
- Low Maintenance & Durability:**
Made from aluminium, naturally corrosion-resistant, and long-lasting with minimal maintenance.
- Wide Range of Applications:**
Streetscapes, parks and recreational areas, commercial developments, shopping centres, building entrances and forecourts, public squares and plazas.
