

Security Cantilever Gate

CLS

OVERVIEW

The Leda CLS Cantilever Gate is a premium, high-performance sliding gate solution designed to provide security, convenience, and aesthetic appeal for a variety of applications. With its innovative cantilevered design, this gate offers a space-saving alternative to traditional swing gates, making it ideal for locations with limited space or uneven ground conditions. Engineered for durability and minimal maintenance, the CLS Cantilever Gate is built to withstand harsh weather and heavy usage while maintaining smooth, quiet operation. Whether for commercial or industrial use, the Leda CLS Cantilever Gate offers a customisable solution tailored to meet your specific security and access requirements.

KEY FEATURES AND APPLICATIONS

- **Cantilevered Design:** The gate's innovative cantilevered structure eliminates the need for ground tracks or rails, providing a space-saving solution that ensures smooth operation, even on uneven terrain.
- **Durability and Low Maintenance:** Constructed with high-quality steel and corrosion-resistant finishes, the CLS Cantilever Gate is built to withstand harsh weather conditions, requiring minimal maintenance over its lifespan.
- **Customisable and Secure:** Available in a range of sizes, finishes, and locking options, the gate can be tailored to meet specific security and aesthetic requirements, making it suitable for both commercial and industrial environments.
- **Applications:** Ideal for both commercial and industrial sites.
