

# Securapost Super XP

**XP90R**

## OVERVIEW

The Securapost Super XP90R is Leda's most popular security bollard, with over 100,000 units installed across Australia. It combines reliable security with user-friendly operation, featuring a unique key system and a secure locking mechanism that anchors it firmly into the ground. This versatile bollard is ideal for securing industrial roller doors, protecting retail storefronts, preventing vehicle theft in automotive businesses, defining access points, safeguarding gates, and deterring unauthorised parking.

## KEY FEATURES AND APPLICATIONS

Leda bollards have been designed and engineered based on intensive market research in conjunction with

- Law enforcement agencies
- Security companies
- Insurance and risk management experts.

Leda has the technical 'know-how' and offers free site audits using trained and experienced staff to advise and recommend.
