

Securapost Super XP

XP90F

OVERVIEW

The Leda XP90F Bollard is a high-strength fixed security solution designed to provide robust protection for commercial, industrial, and public spaces. Constructed for durability and impact resistance, this heavy-duty bollard enhances perimeter security while seamlessly integrating into various environments. Its sturdy design ensures reliable asset protection and access control, making it ideal for high-traffic areas requiring reinforced security. Coated for durability, the XP90F is built to withstand harsh Australian conditions, ensuring long-lasting performance with minimal maintenance.

KEY FEATURES AND APPLICATIONS
