BPIR Declaration

SCOPE OF USE

TRU-THERM™ are suitable for internal and external use in commercial and industrial buildings to provide access to cold storage rooms and to ensure temperature stability and vermin control. The double seal system makes them ideal for ripening rooms. They can be used in other areas where an overhead sectional door is required.

Vision panels are an option for these doors, so therefore could be used to provide some natural light into a building.

CONDITIONS OF USE

TRU-THERM™ must be installed by a competent and experienced commercial door installer, as per the installation instructions

Operating instructions must be followed for correct use.

Openings must be designed with minimum requirements given in the technical drawings.

These doors can be engineered to suit a wind zone in accordance with NZS 3604.

Not to be used where fire ratings are a requirement.

RELEVANT BUILDING CODE CLAUSES

B1 Structure — B1.3.1, B1.3.2, B1.3.3 (a, b, h, j), B1.3.4

B2 Durability — B2.3.1 (b, c)

E2 External moisture — E2.3.2, E2.3.7

F2 Hazardous building materials — F2.3.1

H1 Energy efficiency — H1.3.1 (a, b), H1.3.2E

CONTRIBUTIONS TO COMPLIANCE

Structure

These doors are manufactured from strong, durable materials. Account has been taken for relevant physical conditions, including self-weight, imposed gravity loads and impact to ensure the doors can withstand these forces without being compromised.

Durability

TRU-THERM™ have a durability of at least 15 years under normal use and correct maintenance conditions.

External Moisture

TRU-THERM™ are fitted with a bottom weather seal to limit water ingress. The individual panels sandwich tight together to prevent water from entering joins.

Hazardous Building Materials

TRU-THERM™ are safe when handled.

Energy Efficiency

These doors have an R-Value of 2.63.
