

**Lockin**

# Custom lockers, seating and accessories

---

At Lockin we know one of the crucial elements of life is also a pretty simple one.

### **Space.**

What we do is create spaces. Spaces that are perfectly shaped to support the flexibility our lives need. At the office we keep your hands free, so you have the freedom to change your workspace for meetings, collaboration or concentration. When you commute, we keep all of your gear safe and dry.

And at the gym we make sure your focus is on reaching your personal best, not finding a spot to hide your keys, wallet and phone.

No matter the space, we collaborate with you to understand your need and bring each vision to life. Life is not one-size-fits-all. That's why you'll discover all kinds of Lockin lockers, in all kinds of spaces.

### **Lockin. Made for life.**

# Our philosophy

**We live by three simple principles.**

**Create without limits**

**01**

**Build products that perform**

**02**

**Make spaces for real life**

**03**

Meet George, one of our experienced cabinet makers at Lockin

## Dimensions, materials, finishes, accessories, it's your choice

Some manufacturers will spend a lot of time discussing the limits of what's possible. We'd rather talk about your vision, and how we can make it come to life. Thinking about curved lines? Done. Need something taller, wider or a little more to the left? No problem. Our hi-tech manufacturing facility allows us to customise our products to an unlimited range of needs and options. That means you have the flexibility to choose from a huge range of commercial materials – from standard or decorative laminates to timber veneers, waterproof board, plastic or metals. You also have access to a range of useful accessories like mail chutes, fold out ironing boards and USB ports. Plus you have the chance to get creative with door finishes including perforations, edging, custom graphics, alternating colours and textures.

## We build to your specifications

At Lockin, we're big on collaboration. We take time to understand what you need, and how our products will integrate with the overall design aesthetic of your space. We work alongside our clients, architects and interior designers to make sure we build to your specific requirements and specifications. We're yet to find a space that we couldn't enhance with a custom-made Lockin locker. For example, if your cavity is 1700mm high compared to our standard range height of 1900mm, we'll simply make your locker a little smaller, minus the fuss. At Lockin, you won't have to worry about a hefty price tag for custom-built lockers. We will just build your locker to fit – it's as simple as that.

**Every aspect of your locker can be customised to bring your vision to life.**

Project: JLL Melbourne  
Architect: Hot Black  
Builder: JLL  
Featuring: H3 locker with mail chute, business card holder and code lock

Project: REST E01  
Architect: Gray Puksand  
Builder: MPA  
Featuring: PL2 locker with custom ottomans and airing cupboards

## We believe flexibility shouldn't cost more.

We build every Lockin locker made to order, made to fit, and made for you. This wouldn't be possible without a manufacturing facility that can deliver our promise every time. Our Airport West facility was built for custom production – and not the labour intensive cost prohibitive kind. It's big – big enough to produce a locker every five minutes, and able to respond to any production brief. Our efficiency means we can produce custom lockers for the same price as our competitors do off-the-shelf.

## Start with our base range, or create something new.

We're pretty chuffed with our base range of lockers. They're good looking, functional and full of great, practical innovations to make your life easier. Starting there might give you some great ideas, standard sizes and an easy solution for your storage needs. But if you're looking for something different, we're ready to get creative with you.

Thinking of a new configuration, clothes hooks, extra shelving or drawers? Whatever it is you need, we'll be as keen as you are to see it come to life. If you need any help stretching the limits of what is possible our expert design and production team will answer any questions you have.

**There really is no limit to what you can create.**

Project: EW0V  
Architect: WMK Architecture  
Builder: Plan Group  
Featuring: H3 locker with custom graphics

Project: 101 Collins Street EOT  
Architect: Gray Puksand  
Builder: Shape  
Featuring: P2 locker with Gantner smart lock and custom ottomans

## **Design a space for the users of today and tomorrow.**

### **Our in-house design team are here to help.**

We get it. Sometimes, you need some assistance or you just want to be hands off, and leave the details to a trusted team. Lockin's design and project teams are experienced professionals who stand ready to create an inviting space that solves your storage issue with minimum fuss. At any stage of the process, from creating a brief to final installation, we'll help you explore the possibilities and compare options. When you're ready to go, we can measure, design and build a custom your product that maximises capacity and integrates seamlessly into your space. From small locker room projects to multi-level installations, Lockin has the expert product and design knowledge to support or take the lead in creating aesthetic, functional storage solutions.

Project: 818 Bourke Street EOT  
Architect: Gray Puksand  
Builder: Renascent  
Featuring: P2 locker  
with shoe shelf seat

Create without limits

**We create wildly  
customisable lockers  
tailored to you  
and your space.**

# Build products that perform

## Our lockers are built to last

Lockers can see a lot of wear and tear during their lifetime, so we make sure to only use hard wearing materials and fittings from the best suppliers across the globe. Our standards for performance even flows down to how we manufacture. Unlike our competitors, all of our lockers have a solid 18mm body construction that's nailed and screwed together for maximum strength. And you're backed by a 5 year warranty to guarantee your locker will last.

## We optimise your available space

Lockin has created over 500 locker spaces Australia wide. From small to large scale projects, that's a lot of different spaces with a lot of different design and usage requirements. Our experience means we have the smarts to design and build products that will maximise your available space, without sacrificing usability and functionality. It's about understanding the end user, what their storage solution needs to do, and making sure our lockers work as hard as they can.

**The people who use our lockers work hard, and play hard. They need lockers built to perform.**

Project: 35 Collins Street  
Architect: PTID  
Builder: JLL  
Featuring: Custom H3 locker bank with metal frame & code locks

### **Fast, efficient, modern manufacturing done right.**

As a part of the ARA Manufacture division, Lockin can utilise their 20 years' worth of experience in manufacturing custom engineered products.

Lockin provide hi-tech facilities that include advanced software to integrate all aspects of the production process. From estimating to sign off, our systems track, optimise and quality control every step along the production journey, meeting our deadlines on time and on budget. Our affiliation with ARA Manufacture | ISM also means our lockers can be integrated into a custom joinery piece or combined as part of a total fit out package for commercial projects.

**We have over 20 years  
experience manufacturing  
custom engineered products.**

### Powered by solar

ARA Manufacture are powered by clean, renewable solar energy. Our commitment to looking after the planet led us to install 400 PV cells on the roof of our Airport West manufacturing facility.

### Green star and LEED compliant

ARA Manufacture only provide Lockin manufactured products with environmentally sustainable, hard-wearing materials that are built to last.

All Lockin products are manufactured in Australia using Green Star and LEED compliant materials that meet both the Green Building Council of Australia's five-star rating requirements and LEED platinum certification. Plus, our Lockers can be entirely dismantled, moved and reassembled if you change locations or need to shuffle things around. When we finish a project, we provide you with all the required compliance records so that you can achieve your certifications.

**We believe no product should cost the earth. It's just responsible business.**

# Make spaces for real life

## Our philosophy

Above all, products of the future should be useful. At Lockin we believe in building spaces that fit our lives and help us to perform and succeed – not the other way round. That's why tailor made is so important to us.

What we do is simple, but essential – we build well designed, custom lockers that take care of your gear and free you up to get on with your day. That's what we mean when we say we're made for life.

**At Lockin we take care of your gear,  
so you can get on with your day.**

whiteboard doors

Project: North Melbourne FC  
Architect: HB Architecture  
Builder: Harris HMC  
Featuring: Custom team room  
lockers with code locks

## Made for the not so corporate office

Over the past 50 years things have changed. Our work-places have been transformed from siloed cubicles to open plan spaces that encourage connection and collaboration. The increasing use of hot-desking, flexible work hours and mobile offices all create the need for flexible personal storage options that make efficient use of available space.

In the office, we'll keep your hands free, so you have the freedom to change your work space for meetings, collaboration or quiet concentration.

Project: 800 Collins Street  
Architect: Bates Smart  
Builder: Lend Lease  
Featuring: H4 locker with mail chute  
& LoQit smart lock

### Made for the rise of end-of-trip

Notice the number of bikes at peak hour these days? Pushbike commuters now make up over 5% of our workforce, and numbers are growing every year. That makes end-of-trip facilities an important feature in modern, sustainable residential and commercial buildings. Lockin lockers are designed to keep your gear safe and dry during a pedal-powered commute, and make the transition between work/life environments an easy, stress free journey.

**Today our lives depend on flexibility and mobility.**

Project: 140 William Street EOT  
Architect: Gray Puksand  
Builder: Shape  
Featuring: PL2 locker with Gantner smart lock & custom ottomans

### Made for the next generation of education

Today's education environments are designed to improve student engagement and drive better results. The days of stale classrooms and locker halls have been replaced with innovative open plan spaces that support collaboration and activity based learning. Lockin lockers are easily integrated into these next generation spaces, providing secure storage for your books, your iPad, laptop and bag, freeing you up to learn while your tools are safe and sound.

### Made for clutter free active spaces

If there's one thing you don't want to sweat on during your workout, it's where to store your gear. Lockin lockers have a range of designs and materials created for all kinds of active spaces – from gyms and locker rooms to aquatic centres and yoga studios. A Lockin locker makes sure your focus is on reaching your personal best, not trying to find a spot to hide your keys, wallet and phone.

## **DDA accessible lockers that let every person live work and play together.**

### **Made for the human needs of people with disabilities.**

At Lockin we believe in building spaces that fit our lives – not the other way around. And that applies to everyone who uses our products, no matter their individual circumstances or abilities.

Though there are currently no legislative requirements for accessible locker design, to us it's important that our products meet the intent of the Disability Discrimination Act (DDA) and the applicable Australian Building Standards.

That's why we created the Australian first range of DDA accessible lockers and accessories and our guide to creating DDA compliant locker spaces that meet the human needs of people with disabilities.

Download our PDF guide to creating DDA accessible locker spaces at [www.lockin.com.au/accessible](http://www.lockin.com.au/accessible)

### **Planning and design where it's okay to dream.**

We loath telling you no. So, we don't. During our planning and design phase, we let you dream as big as your budget will allow. From layout to picking the best locking system, our team is here to help you create a functional storage space that people won't want to leave. We also work alongside Australia's finest architects and designers to breathe life into whatever you're seeing behind closed eyes.

### **Custom lockers tailored to you and your lifestyle.**

We craft lockers made for life. And, since Lockers vary as much as the lifestyles of the people that occupy them, we tailor each and every locker to you and your facility's needs from our factory in Melbourne, Australia. Want something super simple and spacious? Say no more. Looking for something outfitted with bench seating, USB ports, a built-in ironing board unit and a digital padlock? Well, we can do that too. And you won't have to lift a finger (if you don't want to). As a part of the ARA Group, just tell us what you want and sit back. We will handle the design, manufacturing, the delivery and the installation as if we were building a space for ourselves.

**We design locker spaces you'll never want to leave.**

### 100% Australian made fresh towel service

We create the most beautiful end-of-trip facilities for some of the most prestigious buildings in Australia. Then we keep these spaces fresh, clean and hygienic with our towel service. Available in Brisbane, Melbourne and Sydney, we'll deliver as many fresh towels as you need as frequently as you need them. Then we'll pick up the dirty ones, launder them in the most environmentally friendly laundries and bring them back to you fluffy, fresh and clean. Plus we're the only towel service that offers 100% Australian made towels that support the Australian textile industry.

### We are part of the ARA Group

Lockin lockers is part of the ARA Manufacture division. The ARA Group provides Essential services for your facility and infrastructure.

ARA has more than 3,000 employees working across our four operating Divisions, Fire & Security, Electrical, Property Services and Products.

With over 80 locations throughout Australia and New Zealand, Lockin can design, build and maintain any locker space.

## Bench seating

Have you tried to tie your shoes when there's nowhere to sit down? Our customisable bench seating is the answer! Our range includes classic timber bench seats, shoe shelves and custom ottomans that can be made to any length or shape. So you'll never have any trouble tying a double knot.

### Standard Construction

**Timber seat:** Polished 90mm Tasmanian Oak bench seat with powder coated or stainless steel frame.

**Shoe shelf seat:** Polished 90mm Tasmanian Oak slats with matching E1 Laminex end panels and ABS edge.

Project: 300 La Trobe Street EOT  
Architect: Gray Puksand

## Timber Seat

## Shoe shelf seat

## Ottomans

### Timber Seat Specifications (mm)

Code	Description	L	W	H	Rail height
S1	Single seat	1500	490	450	-
S2	Double seat	1500	890	450	-
SR	Double seat with rail	1500	890	450	1400

### Shoe Shelf Seat Specifications (mm)

Code	Description	L	W	H	Rail height
SS1	Single seat - freestanding	1500	390	450	-
SS2	Double seat - freestanding	1500	790	450	-
SSA	Shoe shelf seat - attached to locker	∞	390	450	-

All dimensions and specifications can be customised.

### Looking for something special?

Lockin can design and build custom ottomans to complement your space. Choose from timber or upholstered seating and a variety of materials and shapes, the options are limitless.

# Our range

## Locker locks

A locker lock that automatically opens at 6PM every Friday? How about an RFID lock that integrates with your building access card? Or a lock that could dive underwater, re-emerge and get back to work totally unscathed. From basic key locks to intelligent access control systems we have a locker lock for any job.

### What's the difference between shared or dedicated user modes?

Locker locks can be programmed in a variety of different modes to suit the environments they operate within.

In shared mode the user chooses an available locker and operates it with a self-selected code or key. Once the locker is vacated, it becomes available for a different user. This is particularly useful in high traffic environments such as gyms and public areas.

In dedicated mode, the user is assigned a locker and operates it with a fixed code or key. Once set, the fixed code can only be changed by a manager. Dedicated mode works well in schools and offices where a locker belongs to one person only.

### Smart locks (Gantner, Loqit and Ojmar Nexo)

Smart locks are a sophisticated access control system for lockers. Combined with intelligent software, smart locks can be programmed to various operation modes, providing users with RFID access to their locker. Smart lock systems can also integrate with existing access control networks within a building.

## Locker Accessories

What's a hanging locker without a hanger? It's the small details that make a big difference to your space. That's why we offer a range of custom joinery and accessories to make your locker space even better.

Project: Medibank  
Architect: Hassell

### USB Points

With USB points in each locker, people can safely charge their mobile devices.

### Desk Caddy

The perfect office companion made from Global GreenTag™ Certified Woven Image EchoPanel®.

### Security Hangers

Permanent hangers can be provided for use within Lockin hanging lockers.

### Ironing Board

A compact iron and ironing board can be mounted within a locker or to a wall.

### Business Card Holder

With a custom nameplate each user can reserve their locker with a business card.

### Mail Chute

Installing a door mail chute turns your locker into a personal mailbox.

### Airing cupboard

Airing cupboards come with top and door ventilation to keep clothes and shoes dry. Also available with single hanging rail and wire baskets.
